Control Box with Accessory Wire

x1

Y-Splitter

x2

Fuse Tap (3 different sizes)

x1

10ft Extension Cable

x6

Hardwire Power Harness

x1

Metal Screw

x8

WHERE TO INSTALL

RECOMMENDED LOCATIONS FOR ROCK LIGHT PODS

INSTALLATION STEPS

TOOLS REQUIRED

- 5/32-inch Drill Bit
- 7/64-inch Drill Bit
- Phillips Head Screwdriver

1. Designate your mounting locations for each Rock Light Pod and the control box. (Refer to page 4 for recommended mounting locations)

Avoid hot surfaces and/or moving parts.

2. Use a pen to mark the holes where you want to mount the Rock Light Pods. Then, drill a 5/32" hole(s) for the wire connector to pass through.

3. Drill a 7/64" hole for each marked hole.

4. Secure the Rock Light Pods using the included screws. (If mounting on a rounded or uneven surface, utilize the optional rubber mounting pads.)

Caution: Rock Light Pods become extremely hot during use - keep away from any vehicle parts that may be damaged by exposure to high temperatures.

5. Connect all Rock Light Pod wires to the control box connectors. Secure by twisting.

6. Connect the red positive line from the control box either directly to the vehicle battery or by using an open fuse tap.

7. Ground the negative wire from the control box by connecting it to an unpainted area on your vehicle's frame.

Optional: If you would like for the door assist function to be used, it is recommended to connect the door assist wire from the control box to a positive (+) light source that is turned on when the door is open or to the dome light. This will activate the Rock Lights to be ON when the door is turned on.

8. Open the **OPT7 CONNECT**, pair your smart device to the control box, and pick your desired color!

AUX WIRING FOR A DOOR/DOME LIGHT
